MINES AND NATURAL RESOURCES

The Department of Mines and Natural Resources has recently issued a report on the state of the mining industry in the Province of Ontario. The report indicates that the mining industry is showing signs of recovery after a period of depression. The most important factors in this recovery are the discovery of new deposits and the improvement in the methods of extraction. The report also points out that the mining industry is still facing many difficulties, particularly in the area of transportation and the availability of labor. The Department is working to address these issues and to promote the development of the mining industry in the Province.

Free Information for Tourists

Being centrally located on the Continent, "All Tourist Lead to Manitoba," making this Province easy to reach. Tourists who desire to enjoy a holiday, or the delegate who wants to know more about this Province, should write to the Department of Tourist and Convention Bureau, Winnipeg, Manitoba.

Manitoba is a mecca for tourists, easily reached over many international and provincial highways. By air routes, it is reached by the Winnipeg, Brandon, and Portage la Prairie airports. The Province is also served by the Hudson Bay and Churchill ports.

One of the chains of Canada's National Parks System is situated in Manitoba. This is the Riding Mountain National Park, 1100 square miles in extent and one of the largest in the world. It is a beautiful area with many lakes, rivers, and mountains. The park is a great place for hunting, fishing, and sightseeing.

The Tourist and Convention Bureau is desirous of being of helpful service to all those contemplating a visit to Manitoba. If you wish to write, or call on us when in Winnipeg, we will be glad to provide you with all the information you require. We also have a number of places to stay, routes, weather, road maps, maps, time tables, resort literature, etc. The services of our Tourist and Convention Bureau are available at all times.

THE MANITOBA POWER COMMISSION

The Manitoba Power Commission was formed by Act of Legislature in 1919, with the object of making it possible for the Municipalities of Manitoba, by agreement, to obtain at cost, or at a fixed rate, an adequate supply of dependable cheap electrical power.

The Manitoba Power Commission's Hydro System draws its power from the rushing Winnipeg River, one of the greatest sources of power on the Continent, and distributes energy by means of a carefully planned transmission system consisting of a series of high-voltage lines, together with the necessary transforming stations and apparatus. This system supplies electric power to the Cities of Brandon, Winnipeg, and Portage la Prairie, and to many villages and rural districts throughout Manitoba.

The Commission maintains standby plants at Brandon and Virden, and operates a Diesel plant at Birtle supplying the Birtle-Binscarth system—this latter plant will also be used as a standby when the Birtle system is brought into the main transmission system.

By means of transmission systems or isolated plants, every Municipality in Manitoba desirous of obtaining electric power can do so at cost through the Manitoba Power Commission.

MANITOBA FROM A MOTORIST'S STANDPOINT

To the motorist, Manitoba presents a most interesting variety of scenery, for nature has richly endowed this Province with a magnificent playground. The most interesting features are the numerous lakes and rivers, the prairies of the north, one immediately remarks the different and ever-changing landscape, where lakes and streams, dense forests and thundering cataracts, are to be seen. The scenery is so beautiful that it is not surprising to find people who are passing through the Province, stopping to enjoy the view, and taking time to enjoy the beauty of the landscape. The Province is a great place for sightseeing and for enjoying the natural beauty of the land.

Regulations for Motorists in Manitoba

Registration—All motor vehicles and trailers must be registered and display number plates when operating on the highways.

Transfer of Ownership—The registration expires and registration card and number plates must be returned to the Department of Municipal Commissioner.

Chauffeur and Driver's License—All persons driving motor vehicles must carry either a driver's or chauffeur's license.

Age Limits—No person under the age of sixteen allowed to operate any motor vehicle or under twenty-one a vehicle exceeding two and one-half tons in weight.

Change of Address—Licensees to notify the Department of the Municipal Commissioner of any change of address.

Tourists—Given the same privilege as a Manitoba tourist, but not permitted to carry on business in the Province unless they have a proper license.

Lights—Only two low beam headlights casting a white light allowed on the front of a motor vehicle and a rear lamp casting a red light on the rear and illuminating the rear end of the vehicle. A third lamp may be used on the rear end of the vehicle, but it must be a stationary lamp and must be of a color other than red.

Reflectors—To be carried on trailers.

Parking Lights—To be visible both to the front and back of the vehicle showing white or green only at the front and red only at the rear.

Brakes—To be capable under normal conditions of bringing the vehicle when travelling twenty miles an hour, to a stop in not more than forty feet.

Mirror Equipment—A mirror to be attached in such a position as to afford the driver a clear view of the roadway in the rear or of any vehicle approaching from behind.

Tire Equipment—The use of tire chains prohibited.

Warning Device—Warning device to emit sound audible for a distance of not less than two hundred feet. Warning to be given whenever necessary.

Windshield Wipers—All vehicles to be equipped with windshield wipers which are to be controlled or operated by the driver of the vehicle and kept in good working order. Wipers to be used whenever necessary and to be kept in good working order.

Department of Municipal Commissioner.
