I hope this 1973 edition of the Manitoba highway map will help make it easier for both Manitobans and visitors to travel in our province.

If you examine the map, you will find it provides not only information on our road system but also other material of interest to the motorist.

I am happy to say that during the past year Manitoba has spent a record amount on construction and maintenance of our road system. We have added more miles of all-weather roads to make it easier to enjoy the province's leisure attractions and to conduct business, we have upgraded existing roads, and we have provided additional lanes and interchanges on major routes. There are now about 4,000 miles of Provincial Trunk Highways and 7,500 miles of Provincial Roads, both of which are identified by distinctive markers.

Manitoba's highways are being enjoyed by more people than ever before. Drive carefully when you use them so all may travel in comfort and safety.

Peter Burtniak,
Minister of Highways

THE CANADIAN GALLON

Note that the United States and the Canadian gasoline measures *are not* the same.

The Canadian gallon is based on the imperial quart, which is one-fifth larger than the United States quart. (5 Canadian gallons = 6 United States gallons)

APPROXIMATE DISTANCES
From Winnipeg To Canadian and United States Centres
